

Take control of your energy consumption

Discover how, with the Smart Energy Optimiser, powered by V-app, you can leverage real-time insights to empower intelligent choices and:

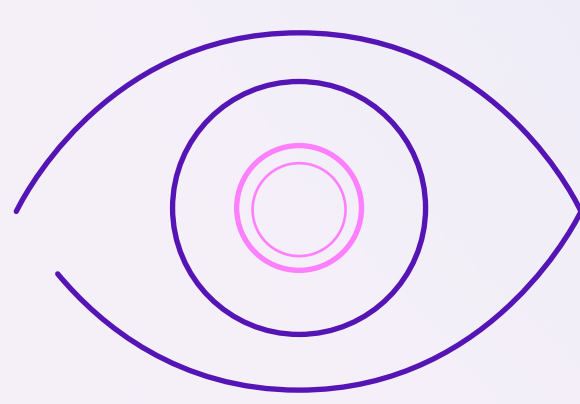

Drive energy savings across your network

Reduce your energy consumption

Lower your carbon footprint

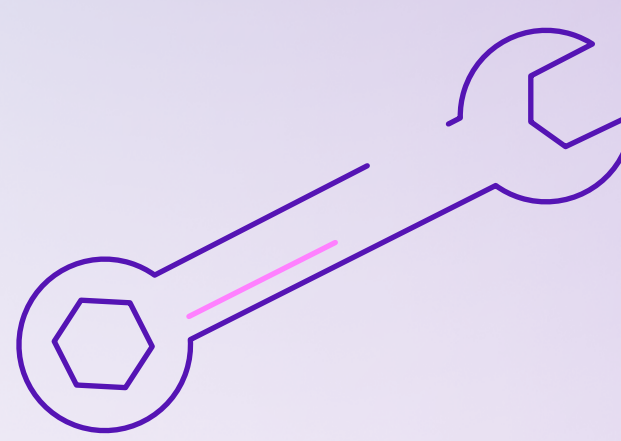

What makes an effective carbon reduction tool?

Granting you full control over the energy use within your organisation, the Smart Energy Optimiser can:

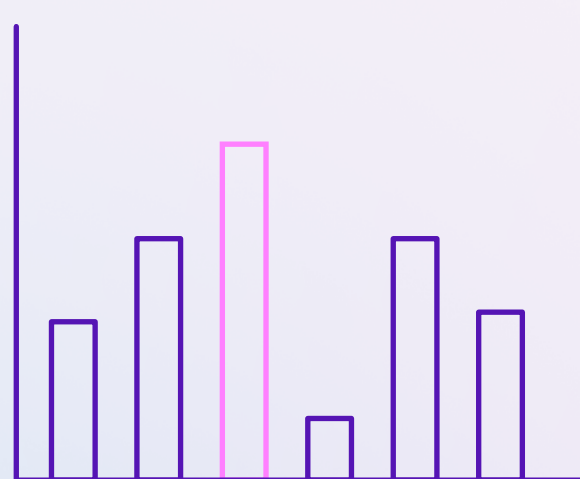

Give you access to real-time monitoring

You can gain immediate visibility into the energy consumption across your various operations and facilities, including the ability to check device status in real-time.

Allow you to customise your energy rules

You can build your own policies by setting up alerts relating to occupancy and energy use - enabling proactive responses or automated actions.

Empower you to leverage intelligent data analytics

With the Smart Energy Optimiser dashboard, you can easily identify patterns, trends and potential areas for improvement.

Reduce your environmental impact

The tool allows you to monitor and measure data relating to energy use, CO₂ emissions and cost to refine your energy parameters and actions.

Success in action

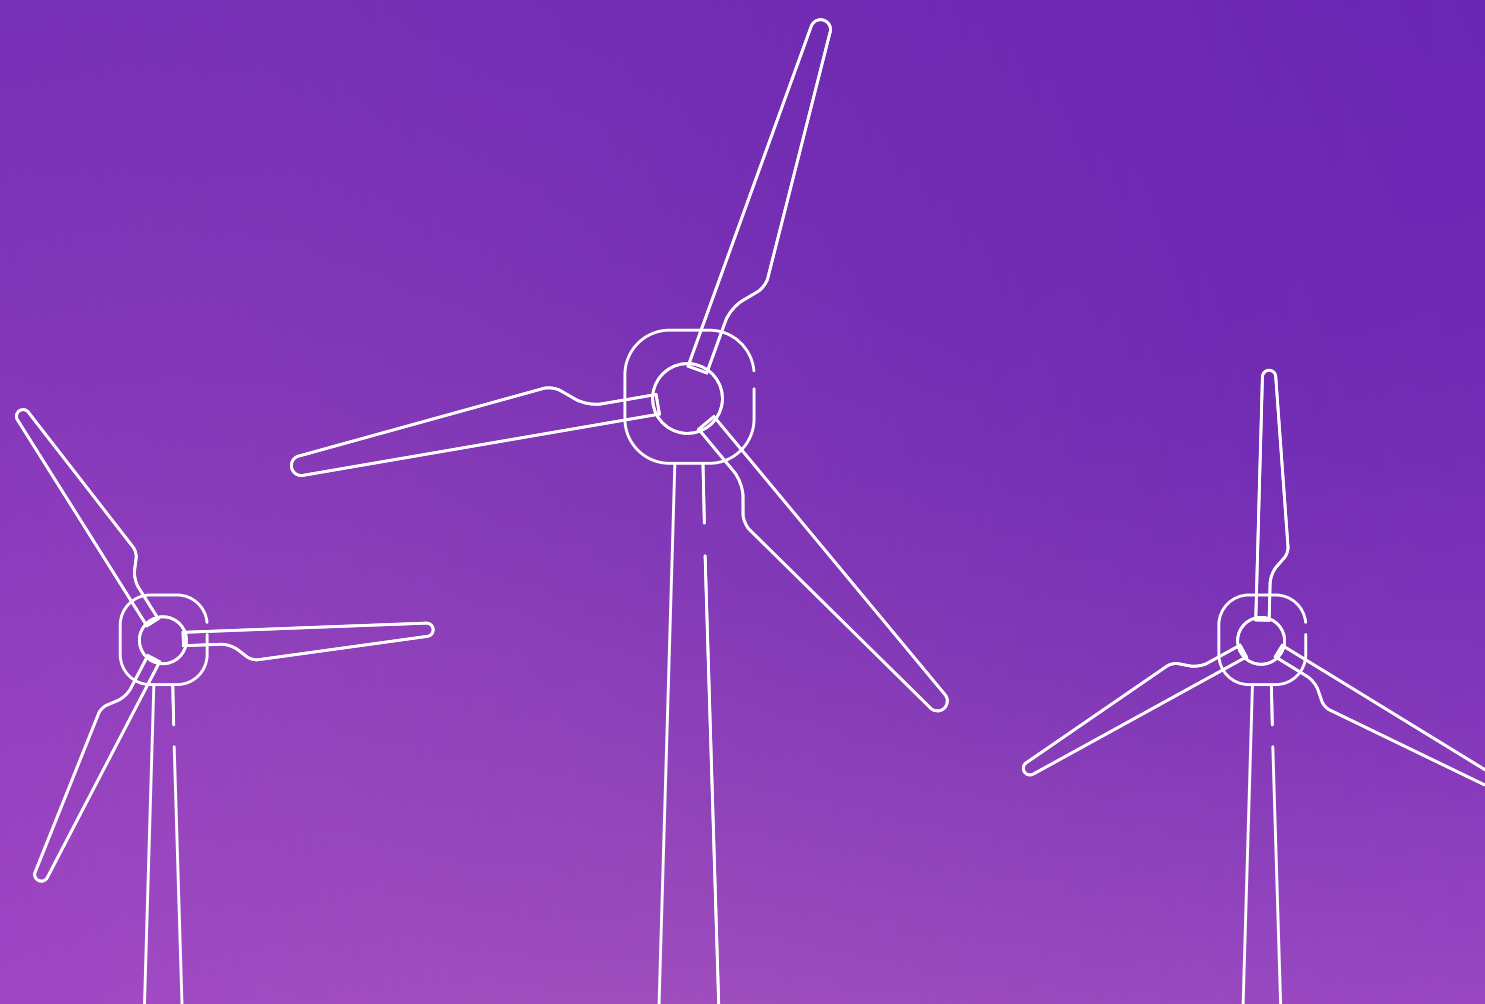

As an organisation with both an unwavering commitment to sustainability and a customer base that's conscious of our carbon emission profile, we were keen to experience first-hand the benefits of this innovative solution.

By implementing the Smart Energy Optimiser in our own office, we realised a:

30%

energy and cost saving*.

*Based on two access points over 30 days.

BT and Cisco: better together

Sustainability is a driving force in our partnership with Cisco. Together, we can accelerate the roll-out of the latest technology and empower you to take control of your energy consumption.

Award-winning progress

Cisco recognised our sustainability work in their 2023 awards.

Expertise in Meraki technology

We have over 1,000 people across the globe with high-level Meraki certifications.

Deep experience of Meraki networks

We've deployed Meraki's second largest global network, managing many tens of thousands of site locations.

Local presence and global reach

Together we serve customers in 180 countries, across six continents.

Master your environmental goals

Digital technology will play a pivotal role in the race to net zero, and the Smart Energy Optimiser has powerful implications for businesses looking to gain control of their emissions.
