

Keep your business protected with Business Antivirus Detect & Respond

Datasheet

In an era where cyber threats are constantly evolving, the surface area for cyber attacks grows. Devices are often the weakest link in your security chain. With cutting-edge Endpoint Detection and Response (EDR) capabilities, Business Antivirus Detect and Respond delivers, keeping your devices and data secure, and your business safe.

Unparalleled security

Powered by CrowdStrike, and enhanced by BT's renowned service excellence, our solution offers robust protection by proactively quarantining malicious files, blocking suspicious processes, and containing endpoints at the network level - ensuring comprehensive security for all your devices, so you can stay focused on your business, without having to worry about cyber threats.

The Benefits

Discover how Business Antivirus Detect and Respond can transform your cybersecurity strategy. Our solution offers a range of benefits designed to enhance your business operations, protect your valuable assets, and ensure compliance with industry standards.

Protect your devices and data

Next Generation Anti-virus (NGAV) technology reduces vulnerabilities, protecting your business, devices and data from cyber threats.

Increase visibility

Get a comprehensive view of your security posture with a Single Pane of Glass (SPOG) dashboard, enabling you to monitor and manage threats more effectively, and enhance overall security awareness across all your secured endpoints.

Enhance threat detection

Leverages real-time threat intelligence with automatic detection and rapid response to protect your business from known and new cyber threats.

Reduce the Risk of Theft

Business Antivirus Detect and Respond actively isolates malicious files, blocks suspicious activities, and secures endpoints at the network level, reducing the risk of data theft – helping to protect sensitive information and maintaining customer trust.

Ensure compliance

Our advanced security measures ensure your policies, configurations and rule sets meet industry standards, reducing the risk of regulatory penalties.

Achieve cost efficiency

Reduce the costs associated with managing and maintaining your own security solution. Our comprehensive service provides expert protection at a lower overall cost, freeing up resources for other business priorities.

Boost productivity

Minimise downtime caused by security breaches. With robust protection in place, your employees can work more efficiently without interruptions, resulting in better business performance and customer satisfaction.

Protect your mobile workforce

With employees working remotely and outside the protection of onsite firewalls, your devices are more vulnerable to attacks. Our solution ensures comprehensive security for all endpoints, regardless of location.

Offices Worldwide.
