Important information
Make a note of your BT Contour 100 Payphone serial number which is printed on the bottom of your phone

Your cash box key number

If you need any help, please visit our website at www.bt.com/payphones

If you need to contact us, please send an email with your query to product.help.payphones@bt.com or call the Payphone Helpdesk free on 0800 25 25 41 and we will be pleased to help you. Lines are open Monday to Saturday, 8am to 6pm.

If you need replacement cash box keys, please call the X2Connect Ltd Helpdesk free on 0800 373 085.

If you would like to speak to our Sales Team, please call the Payphone Sales Desk free on 0800 11 55 11. Lines are open Monday to Friday, 8am to 6pm and Saturday from 9am to 2pm.
Everyday features

These are the most common features and functions, which you will probably use most often. For any other features, see the Extra features section on page 10.

Making and answering calls
These instructions will tell you how to use the payphone for making and answering normal calls, and for making Owner calls.

If you want to make an Owner call – where you don’t have to put in any cash and the calls you make are charged to your normal phone bill – you will find the instructions on page 6.

Money
These instructions will tell you how to empty the cash box, find out the amount of money the payphone has taken, and reset the counter to £0.00.
Making a normal payphone call

Before you make a normal payphone call, make sure you have enough cash ready. Put in the money as soon as your call is answered or the call will be disconnected.

1. Lift the handset
   The display will show **PLEASE DIAL**

2. Dial the number
   The display will show the number as you dial it.

3. Wait for your call to be answered

4. As soon as your call is answered, put your money in
   You will need to insert coins to at least the value shown on the display.
   The payphone will accept 10p, 20p, 50p and £1 coins, and any other coins or tokens you program it to accept (see page 26 for instructions).

5. As you talk, keep an eye on the display
   The display will show how much money you have left. 20 seconds before the money runs out, the display will flash and you will hear a series of beeps. You can add more money at any time during the call, but remember that the payphone does not return any unused coins.
To make another call with your remaining money, don’t hang up

- Press NEXT CALL
- Dial the number
  If you dial the number incorrectly, press NEXT CALL and dial the number again.
- Wait for your call to be answered
- Press * to speak.

To call a pre-programmed memory number, you will need to lift the handset and press the appropriate Memory button. Wait for your call to be answered. As soon as your call is answered, put your money in.

To redial the last number you dialled, don’t hang up

- Press NEXT CALL when you hear the engaged tone
- Press REDIAL
Making an Owner call using your PIN

1. Lift the handset
2. Press \( \star \)
   The display will show PIN
3. Enter your PIN
4. Press NEXT CALL
   The display will show OWNER CALL
5. Dial the number – you do not need to put any money in when your call is answered
6. To make another call, don’t hang up
   – Press NEXT CALL
   – Dial the number
     When you have finished your calls, hang up.
     The payphone will then be ready to make normal payphone calls.

Making an Owner call using your cash box key

1. Lift the handset
2. Unlock the cash box and leave the key in the lock
3. Press NEXT CALL
4. Lock the cash box and remove the key
   The display will show OWNER CALL
5. Dial the number – you do not need to put any money in when your call is answered
6. To make another call, don’t hang up
   – Press NEXT CALL
   – Dial the number
     When you have finished your calls, hang up.
     The payphone will then be ready to make normal payphone calls.
Everyday features:
Making and answering calls

Answering calls

When your payphone rings, you just need to lift the handset to answer the call. The caller will hear a series of beeps which will let them know they are calling a payphone.
Emptying the cash box

You will need the cash box key

1. Lift the handset and rest it on the table or floor
2. Unlock the cash box and lift the cover
3. Empty the cash box tray
4. Replace the tray and lock the cash box

You should check that you have locked the cash box securely by trying to lift the cover.
Checking the total money taken using your PIN

1. Lift the handset
2. Press $.
   - The display will show PIN
3. Enter your PIN
4. Press #66.
   - The display will show MONEY
5. Press # to see how much money the payphone has taken since it was last reset
6. Press # again to see how much money the payphone has taken since it was first used.

Checking the total money taken using the cash box key

You will need the cash box key

1. Lift the handset
2. Unlock the cash box and leave the key in the lock
3. Press #66.
   - The display will show MONEY
   - If it does not, hang up, lift the handset and try entering #66 again.
4. Press # to see how much money the payphone has taken since it was last reset.

After the last step of either method, you can reset the amount to £0.00
Press 0, then #.
- The display will flash once to confirm that you have reset it to £0.00.

Everyday features:
- **Money**

This feature can be activated by following the instructions and using either your PIN or the cash box key.

It is best to use your PIN for the features where you have a choice of methods, as it is easier and more secure.
Extra features

You can use these features to personalise your BT Contour 100 Payphone for your precise needs.

How to get started

You will need to use these instructions to start the programming mode when you want to change any of the extra features. Once you have started the programming mode, you can change as many features as you like as long as you don’t hang up. If you hang up before you have finished programming, you will find a diagram to remind you how to start the programming mode in the left margin of every other page.

1. Lift the handset

2. Unlock the cash box and leave the key in the lock

The display will show PIN

3. Enter your PIN

4. Press +

   The display will show MONEY

   If it still shows PIN

   the PIN was incorrect

   — try entering it again. If you enter the wrong PIN more than once, contact the Helpdesk.
   For contact details, see page 2.

5. Choose the feature you want to program and follow the instructions on the following pages.
Barring certain outgoing calls

You can choose to prevent calls being made from your payphone to certain types of numbers. If a new phone code is launched and your payphone shows BARRLED when you dial the new code, it is because the payphone does not recognise the code. You will need to program the new code in as an exception code, using the instructions on page 27. If the payphone says a number is barred when it shouldn’t be, contact the Helpdesk. For contact details, see page 2.

For information about the types of calls you can bar and the settings on your payphone when you first get it, see the table on the right.

1. Start programming, if you haven’t already
2. Press Memory 2
   The display will show FREE
3. Press Memory 1
   to choose the type of call you want to bar or allow, and keep pressing it to scroll through the choices
4. Press Memory 3 to bar or allow calls
   The display will show the call type and whether it is barred or unbarred, eg PREMIUM to confirm the setting you have chosen
5. Press +
   The display will flash once to confirm the barred and unbarred numbers have been set.
6. Repeat steps 3 and 4 until you have finished
7. Program another feature or lock the cash box, remove the key and replace the handset.
Barring calls made with fake coins or tokens

If you’re having a problem with people using fake coins or tokens, known as slugs, you can program your payphone to reject them.

1. Start programming, if you haven’t already
2. Press S86H
   The display will show TOKEN A 1
3. Press HH
   The display will show SLUG
4. Insert the slug 8 times
   The display will show SLUG OK
5. Program another feature or lock the cash box, remove the key and replace the handset.

Barring incoming calls

You can stop your payphone accepting any incoming calls.

1. Start programming, if you haven’t already

2. Press 444
   The display will show ANSWER x if incoming calls are barred,
   or ANSWER y if incoming calls are allowed.

3. Press Memory 3 to change the setting

4. Press 6
   The display will show SET RINGER SWITCH ON if incoming calls are allowed
   or SET RINGER SWITCH OFF if incoming calls are barred.

5. If you have barred incoming calls, switch the ringer volume to Off – see next page for details
   If you leave the ringer volume on High or Low, the payphone will ring every time someone calls even if you have barred incoming calls, but you will not be able to answer.

6. Program another feature or lock the cash box, remove the key and replace the handset.
Setting the ringer switch

You can switch the ringer off or switch the volume between high and low.

You will need the cash box key

1. Unlock the cash box and lift the cover
2. Switch the ringer to the volume you want – you can choose high, low or off
3. Close the cover and lock the cash box.
Barring old coins from being used

You can stop a coin from being used to make calls, for instance if the design changes or it is withdrawn from circulation.

1. Start programming, if you haven’t already

   The display will show COIN 1OP ✓
   to show that 10p coins are allowed.

3. Press Memory 1
   to choose the coin you want to bar

4. Press Memory 3
   to stop the coin being used
   The display will show COIN 1OP x
   to show that the coin is barred.

5. Press [+] The display will flash once to confirm the coin has been barred.

6. Repeat steps 3 to 5 until you have finished

7. Program another feature or lock the cash box, remove the key and replace the handset.
Withholding your number

If your payphone is not on a payphone line, it may display your number to people you are calling.

You can withhold your number to stop it from being available for people to call the payphone back.

This service is not available on payphone lines.

1. Start programming, if you haven’t already

2. Press $$23H$$
   The display will show WITHHELD ✓ if your number is withheld
   or WITHHELD ✗ if your number is not withheld.

3. Press Memory 3
   to change the setting

4. Press ✪
   The display will flash once to confirm this service is set.

5. Program another feature or lock the cash box, remove the key and replace the handset.
Extra features:  
*Call handling*

**Setting the identification tone**

Callers to your payphone will hear a tone to tell them that they are calling a payphone. BT Operators will recognise this tone and will not connect reverse charge calls. You can choose to turn this tone off, although BT recommend that you leave it on.

1. Start programming, if you haven’t already
2. Press S43H
   - The display will show PID TONE ✓ if the tone is on
   - or PID TONE x if the tone is off.
3. Press Memory 3 to change the setting
4. Press H
   - The display will flash once to confirm the setting has been changed.
5. Program another feature or lock the cash box, remove the key and replace the handset.
Setting the Operator tone

When anyone dials 100 from the payphone, the Operator will hear a tone which tells them that the call is from a payphone so they won’t directly connect or transfer calls for the caller. You can choose to turn this tone off, although BT recommend that you leave it on.

1. Start programming, if you haven’t already

2. Press S67H

   The display will show OP TONE ✓ if the tone is on
   or
   OP TONE x if the tone is off.

3. Press Memory 3 to change the setting

4. Press ✗

   The display will flash once to confirm the Operator tone has been changed.

5. Program another feature or lock the cash box, remove the key and replace the handset.
Setting the privacy feature

If you have another phone connected to the same line as your payphone, you can transfer calls between them, but this also means that it’s possible for calls made on one phone to be overheard on the other.

If you don’t want to transfer calls and you would prefer that people can’t overhear calls on the payphone, switch the privacy feature on. The factory setting for the privacy feature is off.

If you want to transfer calls to the payphone, make sure the payphone handset is lifted before you put down the handset on the other phone.

1. Start programming, if you haven’t already

2. Press S77H

   The display will show
   - PRIVATE ✓ if privacy is on
   - PRIVATE x if privacy is off.

3. Press Memory 3
   to change the setting

4. Press √
   The display will flash once to confirm the privacy feature is set.

5. Program another feature or lock the cash box, remove the key and replace the handset.
Setting an automatic switchboard code

If your payphone is connected to an internal switchboard, you can choose whether the payphone will dial an access code such as 9 for an outside line, or whether callers will have to dial it themselves.

If callers have to manually dial a code between 2 and 9 for an outside line, the payphone will charge the call at local rates. For more information, contact the Helpdesk. For contact details, see page 2.

1. Start programming, if you haven’t already

2. Press `S72H`
The display will show PBX CODE --

3. Enter the code

4. Press `H`
The display will show AUTOMATIC

5. Press `H`
The display will show PRUSE 3.5

   This is the length of time the payphone waits to get an outside line before it dials the phone number.

6. To change the length of the pause, you can
   – increase the pause by pressing Memory 3
   – decrease the pause by pressing Memory 4.

7. Press `H`
The display will show PBX CODE and the code number you programmed to confirm your choice.

8. Program another feature or lock the cash box, remove the key and replace the handset.
Extra features:
Call handling

**Setting a manual switchboard code**

1. Start programming, if you haven’t already
2. Press +7+7+
   *The display will show PBX CODE --*
3. Enter the code
4. Press +
   *The display will show AUTOMATIC*
5. Press Memory 1
   *The display will show USER KEYED*
6. Press +
   *The display will show EXTENSION -*
7. Press the first digit of your extension numbers
   *This will tell the payphone which extensions it may call.*
8. Press +
   *The display will show PBX CODE with the code number you programmed to confirm your choice.*
9. Program another feature or lock the cash box, remove the key and replace the handset.
Removing a switchboard code

1. Start programming, if you haven’t already

2. Press S72H
   The display will show PBX CODE with the number you programmed.

3. Press REDIAL
   The display will show PBX CODE --

4. Press H
   The display will show PBX

5. Program another feature or lock the cash box, remove the key and replace the handset.
Extra features:
Charging

Setting call charges

You can choose which rate your payphone will charge calls at. The rate decides the number of seconds callers get for 10p. It is first set to charge rate 100, but you can choose any rate from 20 to 500. The table on the right shows how many seconds callers will get for 10p at some example charge rates.

1. Start programming, if you haven’t already

2. Press Memory 1 2 4 5

   The display will show the current charge rate.
   To change the charge rate, you can
   – increase the charge rate by pressing Memory 3
   – decrease the charge rate by pressing Memory 4
   – enter a charge rate using the number keys.

3. Press Memory 6

   The display will flash once to confirm the setting.

4. Write the new charges on your payphone notice

5. Program another feature or lock the cash box, remove the key and replace the handset.

Setting the minimum fee

You can choose how much callers will need to put into the payphone to start their call. The minimum fee will automatically adjust to reflect the time and day of the call, and the distance of the call.

1. Start programming, if you haven’t already

2. Press S64H
   The display will show the current minimum fee.

3. To change the minimum fee, you can
   – increase the fee by pressing Memory 3
   – decrease the fee by pressing Memory 4.

4. Press 📷
   The display will flash once to confirm the minimum fee is set.

5. Program another feature or lock the cash box, remove the key and replace the handset.
Extra features:
Charging

Programming new coins or tokens

You can program your payphone to recognise and accept new coins or tokens. For example, if you want the payphone to accept tokens from a games machine, you can decide how much they will be worth and the payphone will accept them. The instructions below will ask you to insert eight of the new coins or tokens. It is better to use eight different ones rather than the same one eight times, so that the payphone recognises the slight differences in the coins or tokens.

If the new coin or token is too similar to an existing coin, the payphone will not be able to accept it.

1. Start programming, if you haven’t already
2. Press S86H
   The display will show TOKEN A 1
3. Insert the first coin or token
   The display will show TOKEN A 2
4. Continue to insert coins or tokens until the display shows TOKEN A £0.00
   If the display shows ERROR
   the new coin or token is too similar to an existing coin and can’t be used.
5. To set the value of the coin or token, you can
   – increase the value by pressing Memory 3
   – decrease the value by pressing Memory 4
   – enter a value using the number keys.
6. Press H
   If you would like to program another coin or token, repeat steps 3 to 6.
7. Program another feature or lock the cash box, remove the key and replace the handset.
Programming exception codes

Your payphone uses the first few digits of any number dialled to determine the charge rate for the call. You can program exceptions to the normal settings. For instance, you could set a certain rate for international calls.

1. Start programming, if you haven’t already

2. Press S39H
   The display will show ------------
   If you have previously entered exception codes, press Memory 3 or Memory 4 to move through the list.

3. Enter the number
   You can enter up to 6 digits.

4. Press 
   The display will show BARRED

5. Press Memory 1 to move through the different call charge types
   The different call charge types are: BARRED, FREE, FEE £0.50, DIR ENQ, WORLD, ASIA, AMERICA, EUROPE, EIRE, PREMIUM, MOBILE, NATIONAL AND LOCAL.
   If you want to charge a fixed fee for a type of call, regardless of the length, go to FEE £0.50 and use Memory 3 to increase the value or Memory 4 to decrease the value. If you choose this option, the caller will only have to put in the fixed fee – the payphone will not ask for more money no matter how long the call is.

6. Press 
   The display will show ------------
   If you would like to program another exception code, repeat steps 3 to 6.

7. Program another feature or lock the cash box, remove the key and replace the handset.

Extra features:
Charging
Extra features:

Cancelling exception codes

You can cancel any of the exception codes you have previously set.

1. Start programming, if you haven't already

2. Press S39H
   The display will show any exception codes you have previously set. Press Memory 3 to scroll up through them and Memory 4 to scroll down through them.

3. Press REDIAL when you come to the exception code you want to cancel

4. Press H
   The display will flash once to confirm the code is cancelled.

5. Program another feature or lock the cash box, remove the key and replace the handset.

Charging for calls to Directory Enquiries

If you do not have a payphone line, you can choose to charge for calls made from your payphone to Directory Enquiries. If you don’t do this, you will have to pay for the cost of any calls made to Directory Enquiries.

1. Start programming, if you haven’t already

2. Press S37H
   The display will show.

3. To set the fee for a call to Directory Enquiries, you can
   – increase the fee by pressing Memory 3
   – decrease the fee by pressing Memory 4

   You may want to charge around 50p for a call to Directory Enquiries.

4. Press H
   The display will flash once to confirm the fee is set.

5. Program another feature or lock the cash box, remove the key and replace the handset.
Setting the payment timer

You can adjust the length of time callers have to put money in before the payphone disconnects them. The factory setting is 39 seconds after you have finished dialling.

1. Start programming, if you haven’t already

2. Press S78H
   The display will show TIMEOUT 39 to show the factory setting of 39 seconds.

3. To change the length of time, you can
   – increase the time by pressing Memory 3
   – decrease the time by pressing Memory 4
   – enter a time using the number keys.

4. Press H
   The display will flash once to confirm the length of time has been set.

5. Program another feature or lock the cash box, remove the key and replace the handset.
Extra features:
Payphone settings

Programming the Memory buttons

You can program up to four memory numbers, such as a local taxi firm, into the payphone. The caller just has to press a Memory button to dial the number.

1. Start programming, if you haven’t already

2. Press **MEM 2**
   The display will show ENTER TEL

3. Enter the phone number you want to program
   You can enter up to 22 digits. If you make a mistake, press **REDIAL** and start again. If callers need to dial a code for an outside line, remember to include the code for an outside line before the number you program.

4. Press the Memory button you want to program the number into
   The display will show the type of call band the payphone will use for calls to this number, for instance.

5. Press Memory 2 to change the call band, and keep pressing it to scroll through the choices – it doesn’t matter if you have programmed a phone number into the Memory 2 button, you can still use it to select a call band
   To set a fixed fee, press Memory 2 until the display shows FEE £0.50 and use Memory 3 to increase the value or Memory 4 to decrease the value. If you choose this option, the caller will only have to put in the fixed fee – the payphone will not ask for more money, no matter how long the call is.

6. Press **MEM 3**
   The display will show ENTER TEL
Repeat steps 3 to 6 until you have programmed all the **Memory buttons** you want.

If you want to offer callers a choice of display languages, don't program a phone number into Memory 4.

Lift up the cash box cover.

Push the display release lever to release the display cover.

The lever is under the sticker marked **DISPLAY RELEASE**. Press the part of the lever under the D of the sticker – you will need to press quite hard. The front of the display cover will come out slightly. It is best to slide something flat under this corner and gently lever the display cover out.

Write the name of the business or service in the space on the card.

Replace the card and press the display cover into place until it clicks.

Program another feature or lock the cash box, remove the key and replace the handset.
Extra features:
Payphone settings

Setting the time and day

Your payphone uses the time and the day to set call charges, so it is important that it is set correctly. You will need to change the time on your payphone when the clocks go forward in spring and back in autumn.

1. Start programming, if you haven’t already

2. Press \[\text{H84H}\]
The display will show \text{TIME} and the current time.

3. Check the time is correct (the payphone uses the 24 hour clock). To change the time, you can
   - move the time forward by pressing \text{Memory 3}
   - move the time backward by pressing \text{Memory 4}
   - enter the current time using the number keys.

4. Press \[\text{H}\]

5. Press \[\text{H832H}\]
The display will show the current day.

6. Check the day is correct. To change the day, you can
   - move the day forward by pressing \text{Memory 3}
   - move the day backward by pressing \text{Memory 4}.

7. Press \[\text{H}\]

8. Program another feature or lock the cash box, remove the key and replace the handset.
Using different display languages

You can set up your payphone so callers will be able to choose to see the display messages in English, French, German, Italian, Spanish or Welsh.

If you choose this option, you will not be able to program a phone number into the Memory 4 button.

1. Start programming, if you haven’t already

2. Press S52H

   The display will show

   if the languages are on

   or

   if the languages are off.

3. Press Memory 3 to change the setting

4. Press H

   The display will flash once to confirm your choice.

5. Lift the cover

6. Push the display release lever to release the display cover

   The lever is under the sticker marked DISPLAY RELEASE. Press the part of the lever under the D of the sticker – you will need to press quite hard. The front of the display cover will come out slightly. It is best to slide something flat under this corner and gently lever the display cover out.

7. Turn the card round so the section with the flags will be next to Memory 4

   Remember to write any memory numbers you have programmed into the other 3 spaces.

8. Replace the display cover and press until it clicks into place

9. Program another feature or lock the cash box, remove the key and replace the handset.
Extra features:
Payphone settings

Changing your PIN

You can change your PIN to one that’s easier to remember. Remember to change your PIN straight away if you think someone might have found out what it is. You will need your old PIN to enter the programming mode, so if you have forgotten it or can’t find it, contact the Helpdesk. For contact details, see page 2.

1 Start programming, if you haven’t already
2 Press S74
The display will show
3 Enter your new PIN
If you make a mistake, finish entering the number then enter your new PIN again.
4 Press H
The display will flash once to confirm your new PIN is set.
5 Program another feature or lock the cash box, remove the key and replace the handset.

Setting the dialling mode

The normal setting is TouchTone™ dialling. If the dialling tone doesn’t stop when you dial a number, switch to Pulse dialling and try again.

1 Start programming, if you haven’t already

2 Press S34
The display will show the current dialling mode.
3 Press Memory 3 to change the dialling mode
4 Press H
The display will flash once to confirm the dialling mode is set.
5 Program another feature or lock the cash box, remove the key and replace the handset.
**Troubleshooting**

Use this section to help you try to solve any problems you may have with your payphone.

Protecting against vandalism and theft
Your Payphone Contour 100 is designed for use in constantly supervised and sheltered sites. It is not recommended for locations where there is any risk of vandalism or theft.

Connecting to the BT Network
The Payphone Contour 100 is approved:
- to provide a public payphone service
- for multi-frequency (tone) and loop disconnect (pulse) dialling
- for inductive coupling to appropriate hearing aids
- for call barring
- for use with compatible:
  - PBXs
  - PABXs
  - key systems
  - dealerboards
  - key and lamp units
  - automatic call distributors which provide a BS6312 compatible port and meet the requirements for simple phones. Your supplier will be able to provide you with a list of compatible apparatus.

Maintaining your Payphone Contour 100
Keep the Payphone clean and make sure that the coin slots are always free of obstructions.
Do not polish the keypad.

Requirements for payphone notices
OFTEL Regulations require you to display a payphone notice which gives the following information:
- details of limitations of access to the 100 Operator service
- what happens to unused coins
- the minimum payment to make a call
- the method of payment
- the full postal address of the location of the payphone
- the person who should be contacted about caller complaints
- how calls are charged
- an indication that 999 and 112 calls are free
- a warning that calls may be overheard where other extensions are connected to the same line.

VAT liability
If you are registered for VAT, you will be required by HM Customs and Excise to account for the VAT on the cash you collect in your Payphone Contour 100.

Liability for calls
You must pay all the BT call charges. Calls are charged at standard BT rates.
You can set the rate that you charge for calls made from your Payphone Contour 100.
You might want to use the money you collect to contribute to the call charges and rental charges.

BT Chargecard calls
Calls made with a BT Chargecard which is charged to your Payphone Contour 100’s phone number will be charged on your phone bill in the normal way. You will not be charged for calls made with other BT Chargecards.
