We believe that technology will shape the future of education. It enriches the learner experience, and enhances the exploration of knowledge and understanding within the digital age.

- We work with over 14,000 educational institutions
- We support learner and staff digital literacy through BT’s Donate to Educate programme
- We support learner attainment through our BT TUTE programme
- We pioneered the IT Ambassadors scheme, which aims to support teachers and young people by growing understanding of what our sector does, how it works and the technologies we use by connecting young people and their teachers with those working in the communications and IT sector
- We support improved learner outcomes through the regular creation of graduate and apprenticeship opportunities across BT
- We are a key UK and global investor in university led research.
