**BT Poly VVX 350**

Ideal for call centres or moderate to high call volumes. This model includes:

- HD Voice and Poly Acoustic Fence technologies
- easy to use and reliable
- ergonomic design
- intuitive interface requiring minimal training
- simple set-up.
The right tools. The best results.

Better for business

BT Poly VVX Range
IP phones to meet your daily business needs. Crystal clear communications. Simple collaboration. Maximum productivity. All with fully integrated Cloud Work for a better communications experience.

This range offers something for every business, including:
- entry level for general use
- mid-range for offices and call attendants
- best-in-class for busy professionals looking for unified communications.

BT Poly VVX 450
A mid-range desktop business phone. Ideal for SoHo, office staff and call centre agents, it comes with:
- HD Voice and Poly Acoustic Fence technologies
- ergonomic design
- colour display for simple call handling
- sophisticated features for an affordable price.

BT Poly VVX 601
A premium business phone. Great for corporate executives and business managers. It offers:
- HD Voice and Poly Acoustic Fence technologies
- large, high-resolution screen with touchscreen functionality
- gesture-based operation. Functions like your smartphone
- simple deployment. Easy to upgrade, administer and maintain.

BT Poly VVX450 or VVX601 Expansion Module
This add-on turns the BT Poly VVX450 or VVX601 into an attendant console for your admin staff. They can manage multiple calls with:
- multi-function line keys that can be set up to match your needs
- power and signalling provided by the host VVX
- no extra set-up required.
The right tools.
The best results.

Better for business

BT Poly VVX Range
IP phones to meet your daily business needs. Crystal clear communications. Simple collaboration. Maximum productivity. All with fully integrated Cloud Work for a better communications experience.

This range offers something for every business, including:
• entry level for general use
• mid-range for offices and call attendants
• best-in-class for busy professionals looking for unified communications.

BT Yealink W60P
A flexible cordless solution that’s ideal for small businesses. Need to leave your desk? Take the handset with you to avoid missing a single call. Included is:
• HD audio quality
• enhanced customer service – answer calls wherever you are
• crystal clear lines thanks to the integrated Power over Ethernet (PoE) (Class 1)
• resistance to interference from mobiles and wireless devices
• energy saving
• W56 handset.

BT Poly IP 6000 Conference Phone
An advanced conference phone that makes remote meetings feel interactive and natural – just like talking face-to-face. It includes:
• unparalleled voice clarity
• patented Acoustic Clarity offers the best conference phone experience
• extensive coverage with a 12-foot microphone pickup and Automatic Gain Control
• industry-leading SIP endpoint software, for advanced call handling, security and provisioning features
• compatible with Cloud Work
• high-res display with multi-language support.

BT Poly OBi302 – Analogue Terminal Adaptor (ATA)
Connect analogue devices to our Cloud Work service. Ideal for businesses that are new to IP technology. Keep your existing equipment and stay in control of your migration to VoIP. An affordable, reliable solution offering:
• excellent voice quality
• multi-tasking – send a fax, be on the phone and check your email, all at the same time
• impressive flexibility with two standard telephone ports with independent numbers, fast Ethernet WAN and LAN ports
• Cloud Work compatibility.
Keep your business talking

A comprehensive set of features that make it easier to manage your calls

**Call analytics**
Get up-to-date, in-depth reporting on key analytics, including quality of service, devices, performance, users and phone numbers.

Boost your business’s productivity with company-wide, department/group, or user-level insights, including call history, adoption, activities and patterns.

**BT Cloud Work app**
Access your phone system from anywhere, at any time, with our Cloud Work service. Install the app on your smartphone to connect with colleagues and customers using your business number, wherever you are.

**Meetings**
This feature lets you be in the room without being in the room. Rather than sinking time and money into physically travelling to your clients or colleagues, connect with online. Make video calls, host conference calls and share your desktop, from anywhere in the world.

**Digital fax**
No need to leave faxes behind. Send and receive faxes digitally through Cloud Work.

- Can be desktop or wall mounted.
- Easy installation and changes.
- Two standard ports.
Appendix

Bring your own device (BYOD)
For best results, we recommend buying one of our dedicated Cloud Work-integrated devices. However, if you’d rather keep your own devices, they may well be compatible with the service.

You may also be able to set up and use your own headsets. Those that we’ve tested to work on the system can be found here.

On the following pages, you’ll find details of Cloud Work compatible phones. If you’re unsure if your device or your headset is compatible, please contact your account manager.

BYOD checklist
Will your device work with Cloud Work?
To make sure your device is compatible, please use the following checklist:

1. Check the device has been approved. If it’s on the list below, carry out a factory reset.
2. Log on to the customer portal and find the relevant user.
3. Configure the device to associate it to the Cloud Work platform.

And that’s it. Although please bear in mind that we cannot guarantee that any BYOD will work perfectly with Cloud Work, or that it will offer full functionality. If you want total peace of mind, we recommend that you choose one of the devices within this brochure.
BT Cloud Work BYOD-approved devices.

The following devices have been tested for use with BT Cloud Work.
