

Bring all your calls into one place

Answer every customer, however they call,
with Mitel MiVoice 6900 Series IP phones.

Move from desk phone to mobile at the touch of a button

Take control of all your calls with Mitel MiVoice 6900 Series IP phones.

When it comes to staying connected to your customers, nothing matters more than picking up the phone. And by linking your mobile to your desk phone, customers can get through – whether you're at your desk or around the office.

Mitel MiVoice 6900 IP phones work hand in hand with your mobile. They're powerful IP desk phones that help you make the most of your MiCloud or MiVoice features. Because they can link to your smartphone and put your contacts and calls in one place, you'll always be ready to answer. Continue to make connections, no matter where you are in the office.

The right phone for every desk

With three powerful IP phones to choose from, you'll have the right tools to control your calls at your fingertips, whatever the business day brings.

MiVoice 6920

Our entry-level model is perfect for small businesses with big ambitions. An optional Bluetooth dongle makes it easy to connect your mobile, access your contact list, and receive mobile calls on your desk phone.

- 18 programmable keys and four context-sensitive soft keys make getting to menus and numbers, simple.
- Quickly add headsets and accessories with a USB port connection.
- Native DHSG/EHS analogue headset support makes hands-free work a breeze.

MiVoice 6930

Forget having to sit at your desk waiting for the phone to ring. The MiVoice 6930 has Bluetooth 4.1 built-in. So you can answer office calls on your mobile, transfer calls between devices, and even access your mobile contact list. Plus, it's got a handy charging port to boost your mobile battery.

- 72 programmable keys across six pages make direct dial numbers quick and easy to call.
- You can navigate your way around the 4.7-inch colour display easily with five context sensitive soft keys.
- And there's always the option to add more accessories.

MiVoice 6940

Get everything you need at your fingertips. A 7-inch touchscreen makes light work of navigation. And with HD audio technology, calls are easy to hear, even in the noisiest office.

- With Bluetooth 4.1 built in, you can sync your desk phone with your mobile.
- 96 programmable keys across six pages should be more than enough for everyone.
- A cordless handset means you can move around while you work.

How they compare

Optional Wall Mount support	Yes	Yes	Yes
LCD PKM support	Yes (3 max)	Yes (3 max)	Yes (3 max)

Looking for more? Add something extra

There are lots of ways to make your MiVoice handsets go the extra mile.

1. Add more lines.

There's a clever, fuss free way to add more lines or extensions to the 6900 phone series. Just plug a programmable key module into the expansion port. You'll instantly add 28 programmable keys that can be used the same way as those built into the phone. You can add up to three in total. They'll all be powered by your phone.

2. Get a wireless headset.

With an integrated DECT wireless headset, you can get up to 300 feet (100 metres) from your phone and still take a call. It's perfect for a quick trip to the printer or a colleague's office.

3. Go hands free.

Add a MiVoice S270 speakerphone and you'll be able to talk hands free while you work on your computer, handle documents or take notes.

4. Go cordless.

With the 6930 model you can upgrade from a standard corded handset to a cordless version, so you're free to talk and walk up to 10 metres away. You'll still hear the same ringtone, even when it's out of the phone cradle. It comes as standard with the 6940 model.

5. Go wireless

Connecting your phone wirelessly to your office or business network means you can use your phone wherever you want. No cables. No ties. Just connect a WLAN adapter to your phone's network using the Ethernet cable it comes with. Our handy adapter connects to all the latest networks, including dual-band 802,11 a/b/g/n types.

You can change the adapter settings using your PC or mobile with our remote management app.

We're a Mitel Platinum Carrier Partner (Mitel's highest accreditation) and their biggest reseller worldwide. That means we can offer you the best of Mitel's technology, backed up with plenty of experience and expertise. With our leading network and mobile services to power it all, you'll get the best service possible – and just a single supplier to deal with.
