

# What you need to know about buying a phone system

## Finding flexibility in a changing world

As the benefits of virtual services are becoming clearer to see, companies using on-premise PBX hardware are starting to wonder whether their wires have been stretched to their limit.

In business, agility, flexibility and mobility are key. If you want to keep up, you need to think differently. And that's where super-flexible and reliable cloud-based communications come in.

### What should you ask?

- How easy it is to scale up and down if things change?
- Will it help your IT team with the pressure of managing multiple sites?
- Will your provider give you the flexibility to adapt things when you need to?
- Will it support BYOD and mobile working, if your workforce is spread out?
- Can your IT, admins, and users make small changes, updates, and fixes easily?
- Can you unify your communications across your global organisation?
- Will it reduce your costs now and in the future?

## What your business needs

Before we jump straight into phone system options, it's good to be clear on exactly what your business needs. That way, you'll have a better idea about what to look for from your supplier.

### **Mid-sized: 50-499 people**

#### **You need a powerful phone system made simple**

- With industry-leading reliability and uptime ratings.
- The type of end-to-end encryption you'd expect in a bank, on any device.
- A 5 star onboarding experience and ongoing support.
- Something that's easy to scale across lots of offices.
- Can bring all your most powerful communications tools together under one system.
- Can integrate with Salesforce®, Google, Box, Outlook® and more.

### **Enterprise: 500+ people**

#### **You need something that integrates with your contact centre and makes managing multiple locations easy**

- A solution that's easy to use and manage.
- With an intuitive product interface.
- A responsive, omnichannel contact centre solution that will integrate with your cloud phone system.
- Something that lets you build open APIs, tools, and tutorials so you can make customer interactions more productive.
- Collaboration tools that make it easier to work together.

## What features to look out for

So now we know what you need. What features should you look out for? Here are the top 'must have' capabilities businesses look for.

### Mid-sized: 50-499 people

- Flexible custom settings and workflow configurations.
- An easy to use admin and user interface.
- Mobility with smartphone apps and desktop clients.
- Innovative features like Business SMS and Google/Box integrations.

### Enterprise: 500+ people

- A reliable and flexible platform; easily add locations, departments and users.
- A centralised system for all users across multiple locations.
- Robust; advanced call management and workflows, integration with business software and cloud services.
- Smart communications reporting and analytics.

## Your options

Generally speaking, there are two types of phone system to choose from. Here's what you need to know about each.

### Traditional, on-premise PBX systems

- These systems come with hardware that you buy and manage
- You'll need a PBX at each location.
- And your IT team will be responsible for setup, management of the system and service reps, plus any ongoing maintenance.
- When it's time to upgrade your system, you can buy and add new modules.

### Hosted/cloud phone systems

- You won't need a bulky box on site with this system, which means fast setup and less maintenance and ongoing management.
- The service is flexible and scales to your needs, cutting infrastructure and costs.
- You only need one system to manage all of your locations across the globe.
- Systems update automatically and can support advanced features, including video conferencing, contact centres, and integrations with CRM, productivity suites such as Google and Microsoft Office 365™.

## We can help you find a better way

We've got years of experience in setting up cloud-based phone systems. In fact we're the industry leaders in both PBX and hosted PBX. We can help you find a solution that will roll all your communications services into one easy to manage, flexible and cost effective solution.

### **We can help you work faster**
