

# Working how you want

Working more productively comes down to working more flexibly. It can cut costs, keep everyone in sync and help you give a better service to your customers. How about giving agile working a go?

## Start here

Nobody wants to be bound to a desk. How can you get your team to feel more connected? Or give better service to customers? And cut costs to become more efficient? Start here.

### Work smarter

Right now, only one in three businesses think they're as productive as they could be. But agile working could change that. And fast.

### Get mobile-savvy

We can support you in making the switch and get to grips with mobile working. Mobile-savvy organisations see an 83% boost in productivity.

### Go remote

80% of organisations could cut long-term costs through agile working. We're experts in giving you everything you need to do just that – from mobile connectivity to communications and collaboration tools.

### Be responsive

We can support you in making the switch and with getting to grips. 50% won't call you back if you miss their call twice. And if they tweet you, they'll want a response in 15 minutes. Are you ready?

### Outstrip the 9-5

Your customers need you outside of work hours. With our technology you can be there for them. EE has the best and fastest mobile network for your employees, so they stay online outside the office.

### Stay reliable

Taking calls and replying to tweets on the move is no good if your signal drops out. We're investing £10bn in our network and systems over the next five years to make sure you can always stay connected.

### Get connected

Switching to flexible working needs everyone to be on the same page. Does everyone in your team have the tools to stay in touch, even when they're miles apart?

### Head to the cloud

With our network and cloud-based systems, your whole team can stay connected, wherever they are. By keeping communications in the cloud, they're instantly accessible and easy to manage remotely.

### Make sure you're secure

Going agile is great, but having a technology partner that can support you through your move is even more important. 90% of UK corporations had a security breach last year. And cyber fraud made-up more than a third of all reported crime. With us, you can be sure that your switch is a safe one. We have over 2,500 security experts checking our security systems (and your business) at all times. We're trusted by the MoD, NHS and emergency services. Where next?
