

Keep your teams protected and secure your data

How our Managed Firewall has helped a public healthcare foundation

A London-based healthcare foundation with 2,100 employees came to us for help with their online security. They wanted to change their firewall provider, and were particularly worried about cost control.

Our Managed Firewall service gives them formidable protection against cyber attacks with real-time scanning of traffic and centralised oversight of their estate, meaning potential

threats are dealt with quickly. We report on their system health and any threats, and free up time they would have spent on monitoring.

We bring a wealth of knowledge and expertise, as well as strategic relationships with key vendors, including Palo Alto, Check Point, Fortinet and Cisco. And our pricing structure means there are no surprises when it comes to costs.

Key benefits

- Stronger security, whatever the size of your organisation.
- Improved Service Level Agreements.
- Maintain control of your security policy.
- Implement 'best practice' approach to security and tech performance.
- Build confidence of customers, suppliers and partners over data protection.
- Increased productivity through less down-time and fewer unproductive applications on network.
- Visibility of your system health and threat activity, giving you peace of mind.
