

# Keep your teams protected and secure your data

## How our Managed Firewall has helped a large metropolitan council

An ambition to grow digitally led a major metropolitan council with 15,000 employees to talk to us about their online security. They were going through a process of change and IT modernisation, and wanted to install a full-fibre network that reached schools, NHS centres and their council buildings. Naturally, they were concerned about protecting their data, but they also wanted to keep an eye on costs.

We're already a major local presence, supporting community initiatives across the city, and have a wealth of experience and expertise in digital

security. We now provide them with a world-class fibre network – and by using our Managed Firewall service, they get formidable protection against cyber attacks and centralised oversight and monitoring of their estate, meaning potential threats are dealt with quickly.

We have strategic relationships with key vendors – including a platinum partnership with Fortinet, one of the world's leading cyber security companies – and our pricing structure means there are no surprises when it comes to costs.

## Key benefits

- Managed service saves time and improves productivity.
- Best-in-breed security solution.
- Maintain control of your security policy.
- More agile security for an increasingly flexible workforce.
- Improved collaboration, as you can focus on your core activities.
- Visibility of your system health and threat activity in real time, giving you peace of mind.
