

Increase network flexibility and cut costs as you protect yourself from risk

How our Managed Firewall has helped a large UK-based charity

A well-known British charity, with a workforce comprising 95% volunteers, was going through a period of modernisation and digital transformation. Concerned about the safety of their SD-WAN solution and the rising cost of cyber security, they spoke to us about our Managed Firewall service.

We were able to give them a tailored solution – a full package of network

and security provision, with the level of service they needed. The engineers and analysts in our accredited Security Operations Centres specialise in firewall configuration, and proactively monitor its performance. And our strategic relationships with key vendors, including Palo Alto, Check Point, Fortinet and Cisco, mean we can offer competitive pricing and the best support.

Key benefits

- Stronger security, whatever the size of your organisation.
- Remain in control of your security policy while seeing it expertly maintained.
- Better network performance and speed.
- Monitoring and reporting gives you information on system health and threat activity.
- A solution tailored to your enterprise.
- Flexibility to fit you, whether you use simple internet links or a large-scale SD-WAN infrastructure.
- A full suite of Next Generation Firewall (NGW) capabilities.
- More control over your costs.
- Increased productivity through less down-time.
- Visibility of your system health and threat activity, giving you peace of mind.
