MiCloud CC, Contact Centre at your service
An effortless way to help more customers
Located anywhere, scalable anytime

Being in the cloud gives you more flexibility. Your agents can deliver the same great customer experience from anywhere in the world. Plus, you’ll also be able to scale easily. Allowing you to meet seasonal and growth demands head-on.

Cut costs, increase standards

Delivering exceptional service doesn’t have to break the bank. You can get all you need in a single solution hosted in the cloud. Without spending time and money on servers or additional software.

Your customers will be happier. And so will you.

Higher customer satisfaction levels and increased sales. Two things nearly every business strives to achieve. MiCloud CC is the cost-effective way for you to do just that.

Meet your customers’ high expectations

In today’s digital age, your customers want to be able to connect any time of day or night. On the channels they prefer to use. And receive instant answers.

MiCloud CC allows you to exceed your customers’ expectations. It will help you deal with more requests, effortlessly, through voice, email, webchat, text, chatbots and social media. A single, powerful, easy-to-use platform giving your customers better, faster service. On their terms. Not only do we offer a full multi-media, omni-channel contact centre, but also a voice only option with advanced functionality.
How MiCloud CC works for you, your people and your customers

MiCloud CC isn’t just flexible. It’s reliable too. Your communications will never go down due to a single network outage or hardware failure. So you won’t miss a beat on your customer support.

All information and voice calls go securely over the public internet or private network to reach their final destination. And for added reassurance, there’s the option to backup your data on the other side of the world, in case disaster strikes.

Your team also gets great service. Whether they’re in the main office, at a satellite location or working from home in their tracksuit bottoms, they can access the same tools. So they can work with total consistency.
Do more, deliver more

Respond and resolve faster
You’ll be able to handle more customer requests, with fewer agents. Agents can channel hop with ease, while the real-time collaboration tools give them the power to resolve customer enquiries first time.

Cost-effective agent locations
The browser-based user-interface requires no software or equipment to be installed. So your agents can easily work from anywhere in the world.

Effortless administration
The simple drag-and-drop interface lets you create sophisticated interaction flows, without complex programming.

Better contact centre performance
Your centre supervisors can access real-time and historical reports to measure, manage and drive efficiencies.

Work in harmony
To maximise your business’ performance and productivity, MiCloud CC connects to your key business applications.
How to get in touch
